  - 534 Service call invoice for fire pump 5-29-19.pdf(~222 KB)

Claude & Steve,

GM Pump went to the building yesterday and partially took the fire pump apart and discovered the internal sleeve was broken. They said the pump would have to be removed and brought back to the shop. Attached is the new proposal and the invoice for yesterday's work. They said the fire pump can be removed on Monday and returned on Tuesday.

The proposal for the boiler circulating pump is also attached. GM Pump will need to remove the pump and bring it back to the shop to rebuild it. They can remove this pump on Monday as well and bring it back on Tuesday.

Let me know if you would like to proceed.

Regards,

Patrick Sullivan
