MATERIAL HANDLING PLAN:

This will pertain to all rack and pinion Hoists not just personal
hoists and all Construction Equipment.

- Before a loaded boom is swung over a hoist, the hoist must be brought down to its lowest level, and everyone must exit the hoist.
- At no time can any construction equipment come within two feet to any part of the hoist (excluding setup and jumping of the hoist).
- At any time if any construction equipment comes within fifteen feet of the hoist, a protocol must be established. This is a minimum standard, if any equipment is to be used with in the fifteen foot buffer it must be included in the plan
- All signal personal and hoist operator must be in radio communication with each other during operations within fifteen feet of the hoist.
- Whenever a piece of construction equipment comes within fifteen feet of the hoist at least one signal person must be assigned to that operation.
- If a loaded boom is swung over a hoist, see option one, and when the load is off the boom, the signal person lets the hoist operator know that they can precede as normal.
- If any construction equipment is to be permanently located within 15' of the hoist it must be listed in this protocol.(state weather or not this is the case)
