Dear Customer:

We understand that there is an issue with your internal gas equipment and your Con Edison gas service has been temporarily turned – off. In order to correct the condition and restore your gas service, a licensed plumbing contractor must repair or replace all defective equipment. As part of the self-certification process, your plumber is responsible for submitting, a pressure test affidavit, letter of intent, or Dept. of Building's Certificate; noting only the areas which have successfully passed a pressure tested and are ready to be turned on.

All work must be done in accordance with Con Edison specifications and requirements which can be located via our website; <http://www.coned.com/es/specs/gasbluebook.pdf>. All associated documents, certificates must be submitted before the service is restored. These documents can be submitted online through the CPMS portal in Project Center, or emailed to the district distribution list address; (dl-manh-district400@coned.com). Please ensure the documents are in PDF format, and reference the Case # in the subject line.

If you have any questions or concerns regarding this work, or if you are ready for an inspection an Energy Service Representative can be reached at (212) 780-3134, Monday – Friday, 7:00am – 3:30pm.

Please note: if a gas trouble case remains inactive for more than 30 business days, the case will be closed out and a cancellation notice will be sent

Sincerely,  
Barbara Vasquez
