We measure your electricity by how many kilowatt hours (kWh) you use. One kWh will light a 100 watt bulb for 10 hours. The meter multiplier is the factor by which the meter reading difference is multiplied to determine your usage. Demand or kW is the highest amount of electric usage in any half hour during the billing period.

## Your electricity charges

These charges are for the electricity you used (supply) and getting that electricity to you (delivery). Rates are based on a 30 day period. When your billing period is more or less than 30 days, we prorate your bill accordingly.

### Electricity you used during this 32 day billing period from Feb 05, 2016 to Mar 08, 2016

Rate: EL9 General Large Meter# 8465791

We measure your electricity by how many kilowatt hours (kWh) you use. One kWh will light a 100 watt bulb for 10 hours. The meter multiplier is the factor by which the meter reading difference is multiplied to determine your usage. Demand or kW is the highest amount of electric usage in any half hour during the billing period.

Gas meters measure the volume of natural gas. Gas usage is billed in therms, the heat content of gas. The meter multiplier is the factor by which the meter reading difference is multiplied to determine your usage in ccf (hundred cubic feet). The therm conversion factor converts ccf into therms. Your total gas use is the sum of the usage from your various meters which follow.
