## INTEREST AND FEES

### INTEREST RATES - ANNUAL PERCENTAGE RATES (APRs)

This section provides the interest rates, also referred to as corresponding Annual Percentage Rates (APRs), which are applicable to your account. The APR corresponds to the Daily Periodic Rate (DPR): the APR is equal to the DPR multiplied by 365, and the DPR is equal to the APR divided by 365. Interest charges are calculated by using the DPR. If a rate is a variable rate, we calculate that APR by adding together an index and a margin. For more information on variable rates, please refer to the *How to Calculate Variable Rates* section within this summary.

### Promotional Rates and Fees

Promotional or Introductory Offers are temporary APRs (Promotional or Introductory Rates) or transaction fees (Promotional or Introductory Fees) that are offered on certain qualifying new transactions for a specified period of time. Each Offer will be assigned a unique Offer ID which will appear on your credit card statement after the first qualified new transaction for that Offer. If you revolve your balance to take advantage of a Promotional or Introductory Offer, all transactions and balances, including purchases, will be charged interest.

Your account has the following Promotional Offers:
