HOLDINGS

This section reflects positions purchased/sold on a trade date basis, and includes positions purchased and omits positions sold in the current month. "Market Value" and "Unrealized Gain/(Loss)" are representative values as of the last business day of the statement period and may not reflect the value that could be obtained in the market. Fixed Income securities are sorted by maturity or pre-refunding date, and alphabetically within date. Estimated Annual Income (EAI) is calculated on a pre-tax basis and does not include any reduction for applicable non-US withholding taxes, if any. EAI for certain securities may include return of principal or capital gains which could overstate such estimates. For securities that have a defined maturity date within the next 12 months, EAI is reflected only through maturity date. Actual income or yield may be lower or higher than the estimates. Estimated yield reflects only the income generated by an investment, and does not reflect changes in its price. Structured products, identified in the Security Description column, appear in various statement product categories. Accrued interest, annual income and yield for structured products with a contingent income feature (such as Range Accrual Notes or Contingent Income Notes) are estimates and assume specified accrual conditions are met during the relevant period and payment in full of all contingent interest. For Floating Rate Securities, the accrued interest, annual income and yield are estimates based on the current floating coupon rate and may not reflect historic rates within the accrual period. New Treasury regulations require that we report on Form 1099-B, after the close of the tax year, your adjusted cost basis on the sale of covered securities acquired on or after January 1, 2011, and classify the gain or loss as either long-term or short-term. These regulations also require that we make basis adjustments on covered securities due to wash sales, certain corporate actions and transfers by gift or inheritance, which will be reflected on your Form 1099-B. Cost basis is reflected on statements for informational purposes and should not be used in the preparation of your income tax returns. Refer to the Expanded Disclosures for additional information.

CASH, BANK DEPOSIT PROGRAM AND MONEY MARKET FUNDS

Cash, Bank Deposit Program, and Money Market Funds are generally displayed on a settlement date basis. Estimated Annual Income, Accrued Interest, and APY% will only be displayed for fully settled positions.

HOLDINGS

This section reflects positions purchased/sold on a trade date basis, and includes positions purchased and omits positions sold in the current month. "Market Value" and "Unrealized Gain/(Loss)" are representative values as of the last business day of the statement period and may not reflect the value that could be obtained in the market. Fixed Income securities are sorted by maturity or pre-refunding date, and alphabetically within date. Estimated Annual Income (EAI) is calculated on a pre-tax basis and does not include any reduction for applicable non-US withholding taxes, if any. EAI for certain securities may include return of principal or capital gains which could overstate such estimates. For securities that have a defined maturity date within the next 12 months, EAI is reflected only through maturity date. Actual income or yield may be lower or higher than the estimates. Estimated yield reflects only the income generated by an investment, and does not reflect changes in its price. Structured products, identified in the Security Description column, appear in various statement product categories. Accrued interest, annual income and yield for structured products with a contingent income feature (such as Range Accrual Notes or Contingent Income Notes) are estimates and assume specified accrual conditions are met during the relevant period and payment in full of all contingent interest. For Floating Rate Securities, the accrued interest, annual income and yield are estimates based on the current floating coupon rate and may not reflect historic rates within the accrual period. New Treasury regulations require that we report on Form 1099-B, after the close of the tax year, your adjusted cost basis on the sale of covered securities acquired on or after January 1, 2011, and classify the gain or loss as either long-term or short-term. These regulations also require that we make basis adjustments on covered securities due to wash sales, certain corporate actions and transfers by gift or inheritance, which will be reflected on your Form 1099-B. Cost basis is reflected on statements for informational purposes and should not be used in the preparation of your income tax returns. Refer to the Expanded Disclosures for additional information.

CASH, BANK DEPOSIT PROGRAM AND MONEY MARKET FUNDS

Cash, Bank Deposit Program, and Money Market Funds are generally displayed on a settlement date basis. Estimated Annual Income, Accrued Interest, and APY% will only be displayed for fully settled positions.

HOLDINGS

This section reflects positions purchased/sold on a trade date basis, and includes positions purchased and omits positions sold in the current month. "Market Value" and "Unrealized Gain/(Loss)" are representative values as of the last business day of the statement period and may not reflect the value that could be obtained in the market. Fixed Income securities are sorted by maturity or pre-refunding date, and alphabetically within date. Estimated Annual Income (EAI) is calculated on a pre-tax basis and does not include any reduction for applicable non-US withholding taxes, if any. EAI for certain securities may include return of principal or capital gains which could overstate such estimates. For securities that have a defined maturity date within the next 12 months, EAI is reflected only through maturity date. Actual income or yield may be lower or higher than the estimates. Estimated yield reflects only the income generated by an investment, and does not reflect changes in its price. Structured products, identified in the Security Description column, appear in various statement product categories. Accrued interest, annual income and yield for structured products with a contingent income feature (such as Range Accrual Notes or Contingent Income Notes) are estimates and assume specified accrual conditions are met during the relevant period and payment in full of all contingent interest. For Floating Rate Securities, the accrued interest, annual income and yield are estimates based on the current floating coupon rate and may not reflect historic rates within the accrual period. New Treasury regulations require that we report on Form 1099-B, after the close of the tax year, your adjusted cost basis on the sale of covered securities acquired on or after January 1, 2011, and classify the gain or loss as either long-term or short-term. These regulations also require that we make basis adjustments on covered securities due to wash sales, certain corporate actions and transfers by gift or inheritance, which will be reflected on your Form 1099-B. Cost basis is reflected on statements for informational purposes and should not be used in the preparation of your income tax returns. Refer to the Expanded Disclosures for additional information.

Margin Privileges (not available for certain accounts such as IRAs or retirement accounts)

If you have margin privileges, you may borrow money from us in

exchange for pledging assets in your accounts as collateral for any outstanding margin loan. The amount you may borrow is based on the value of the eligible securities in your margin accounts. If a security has eligible shares, the number of shares pledged as collateral will be indicated below the position.

Margin Interest Charges

We calculate interest charges on margin loans as follows: (1) Multiply the applicable margin interest rate by the daily close of business net settled debit balance, and (2) Divide by 360 (days). Margin interest accrues daily throughout the month and is added to your debit balance at month-end. The month-end interest charge is the sum of the daily accrued interest calculations for the month. We add the accrued interest to your debit balance and start a new calculation each time the applicable interest rate changes and at the close of every statement month. For current margin loan interest rates, go to www.morganstanley.com/online/MIRates

The permanent record of the Special Memorandum Account as required by Regulation T is available for your inspection at your request.

Structured Products

Structured Products are complex products and may be subject to special risks. Investors should consider the concentration risk of owning the related security and their total exposure to any underlying asset. Structured Products may not perform in a manner consistent with the statement product category where they appear and therefore may not satisfy portfolio asset allocation needs for that category.
