## Explanation of Charges

### Verizon Wireless' Surcharges

Verizon Wireless' Surcharges include charges to recover or help defray costs of taxes and of governmental charges and fees imposed on us, including a Regulatory Charge (which helps defray costs of various regulatory mandates, including government number administration and license fees) and a Federal Universal Service Charge (and, if applicable, a State Universal Service Charge) to recover costs imposed on us by the government to support universal service, and may include other charges also related to our governmental costs. It also includes an Administrative Charge, which helps defray certain costs we incur, currently including (i) charges we, or our agents, pay local telephone companies for delivering calls from our customers to their customers, (ii) fees and assessments on network facilities and services, and (iii) certain costs and charges associated with proceedings related to new cell site construction. Please note that these are Verizon Wireless charges, not taxes. These charges, and what's included, are subject to change from time to time.

### Taxes, Governmental Surcharges and Fees

Includes sales, excise and other taxes and governmental surcharges and fees that we are required by law to bill customers. These taxes, surcharges and fees may change from time to time without notice.

### Late Fee Information

A late payment applies for unpaid balances. The charge is the greater of \$5 or 1.5% per month, or as permitted by law.

### Verizon Wireless' Other Charges and Credits

Includes charges for products and services, and credits owing.

### Important Information Regarding Data Usage

Verizon Wireless strives to provide its customers with the best experience when using our network, a shared resource among tens of millions of customers. To further this objective, Verizon Wireless is implementing Network Optimization Practices designed to ensure that the overwhelming majority of data customers aren't negatively impacted by the inordinate data consumption of a few users. Network Optimization is based on the practice that if a cell site is not congested, your connection speed will not be impacted. If you're in the top five percent of data users, you may experience a reduction in your average data speeds only when you are connected to a congested cell site. You may experience this for the remainder of your then current bill cycle and immediately following bill cycle. This can help ensure high quality network performance for our entire customer base. For more information, please see [www.verizonwireless.com/networkoptimization](http://www.verizonwireless.com/networkoptimization)

### Celebrate Hispanic Heritage Month With Verizon Wireless!

### Revisions To Customer Agreement

Verizon Wireless is updating several provisions of your Customer Agreement: (i) we have incorporated the data collection, use and sharing practices outlined in our Privacy Policy ([www.verizon.com/privacy](http://www.verizon.com/privacy)) into our Customer Agreement, and informed you how to make choices about how we use data we have about your wireless use, (ii) we have specified the amount of our fees for reactivating terminated, or reconnecting suspended, service, and (iii) we have made it easier for you to arbitrate disputes you have with us, including agreeing to pay any arbitration fees even if you choose to not participate in our free dispute mediation program.
