Dear Wei,

Enclosed are the two 20 yard sample rolls that you requested from the batch of P379 True White that we processed for you; Batch#7312315, your order #1533.

Please note that we discovered a random "distortion" on the front & back of the goods when we examined them under a certain light. One of the 20 yard rolls (#13448-19-4) represents the worst of the condition and the second 20 yard roll (#13438-19-3) represents a better piece. We are not certain where this occurred in the processing of the goods and are going to follow the next lot that we process to see what might have caused it. After we ran this lot, we ran another fabric that is just as sensitive without consequence so we're at a loss for what caused this unless it might have been from the goods rubbing against themselves in the jet. We may be making more of an issue of this than it is, but are trying to determine the cause and what to do to correct it.

Elaine has not sent you any packing details on this lot because it is on hold until we hear from you on what you want us to do.

Please advise if you have any questions.

Thanks and regards,

Dale Wagner
