Dear Wei,

Enclosed are the initial 5 yard greige samples of your style #P180 after we have turned it into the machine.

A sample of these greige goods was also sent out UPS Regular to Claude's home, as instructed on the order.

If you find these goods to be acceptable, please confirm that we are okay to proceed based on the terms outlined in my email of November 10th: "I did receive the pricing on the P180 and the price per pound to knit an EOQ of this style works out to be \$3.10/lbs. An EOQ for this style based on the speed that this style knits is 2162 pounds. Based on this pricing the cost of knitting the 300 pound trial that you were ordering works out to be \$2000; roughly half to cover the knitting of the 300 pounds and the balance to cover the cost of setting up and than pulling out the warps once the 300 pounds is complete."

Thanks and regards,

Dale Wagner
