Attn: Claude

254 Fifth Avenue, 3rd Floor

New York NY 10001

Dear Claude:

As discussed, enclosed is a sample of the 20 denier monofilament polyester tulle that has the correct diamond shaped openings. Specifications are as follows:

Count/Inch:	17 x 16.5
Opening Sizes:	800 - 845 $\mu$
Weight:	0.8 opsy
Thickness:	0.007"
Width:	Best [60" preferred]
Roll Lengths:	500 yards

Best regards,

A handwritten signature in cursive script, reading 'Ellen E. Moltz'.

Ellen E. Moltz

April 25, 2013

Mr. Lance Whitaker  
VERATEX, INC.  
254 Fifth Avenue, 3rd Floor  
New York NY 10001-6406

Dear Lance:

Enclosed are two mesh knit samples.

**20 Tulle:** 20 denier polyester tulle. Very stable construction. Currently used for some milk filters. We have been advised that the thickness, hole openings and mullen burst strength on this fabric works very well. The standard 15 denier nylon [bridal veil] tulle is too weak. [35 psi on the polyester and only 10 - 12 psi on the nylon]. The thickness on this fabric is 7 mils [.007"].

**40 den Hex Stitch:** This is a sample that we received from a company that is no longer in business. The hex stitch construction provides similar hole opening sizes to the 20 Tulle. However it is much stronger and is thicker at 11 mils [.011"]. This sample is included to show the hex stitch construction,

**The 20 denier PE Tulle may require a huge minimum order since that fiber is not routinely used in these types of constructions. Would there be a smaller minimum order quantity using a 15 denier nylon in the stronger hex stitch construction?**

Best regards,

A handwritten signature in cursive script that reads 'Ellen E. Moltz'.

**Subject:** Sample

Dear Lance:

I need to send that 20 denier polyester tulle sample to you in New York?

Customer has finally completed prototype testing and is ready to send out samples to have enough inventory for the initial set of orders, but need to get updated price, minimum order quantity based on the specs shown below. It has to be polyester and not nylon due to chemical compatibility reasons. And, we need the very thin 20 denier yarns constructed in the mesh matrix to maintain a maximum thickness and still have the correct hole openings.

Yarns: 20 denier monofilament polyester  
 Construction: Tulle [Mesh Knit]  
 Count / Inch: 17 x 16.5  
 Opening Sizes: 800 - 845µ  
 Opening Shape: Diamond  
 Weight: 0.8 oz / sq yd  
 THICKNESS: 0.007"  
 Width: 54" or 62" [ADVISE BEST AVAILABLE]  
 FINISH: REFIN & HEATSET

FYI: they need the larger openings of this fabric and the thickness no greater than 0.010". We also sent a sample of the style V11301 [59-22412], and the openings were too small at only 275 - 300µ. We also sent a sample of the standard 800µ 70 denier polyester [marquisette] knit [square openings], but the fabric is too thick at 0.0125"

ADVISE BEST PRICE, MINIMUM ORDER QUANTITY AND OPTIMUM WIDTH.

Best regards,  
 Ellen Moltz
