5630 Scan Form Instructions

City Carrier Instructions: In the event the carrier arrives at a delivery point and finds packages for pickup and there is no package pickup request or PS Form 5630, the carrier will still collect and scan all available mail as picked up. Upon return to the Post Office, the carrier should report the location of the customer who did not provide a complete PS Form 5630.

Rural Carrier Instructions: In the event the carrier arrives at a delivery point and finds packages for pickup and there is no package pickup request or PS Form 5630 presented, the carrier will still collect all available mail. If there are five (5) or fewer pieces requiring an acceptance scan, the carrier must scan each piece. It is not required that the carrier scan each piece if a large quantity of parcels (6 or more) are being picked up.
